Subject: R5 CSD Sampling Budget

Hi Cheryl,

We've received the revised price proposal from WI State Lab of Hygiene. With the remaining budget, you could send 82 groundwater samples to the University of Nebraska for nitrate/nitrite and N15 Isotope analysis, and 3 sets drinking water samples (for the 5 analytes) to the Wisconsin State Lab of Hygiene. This is just one option.

If you'd like to calculate the total cost to analyze a different number of samples, please use the loaded unit costs for each analyte provided below. Please note that you have \$ Ex. 4 CBI of budget to work with, which accounts for the funding that we've already spent and the time for ERG to check the results when they come in.

Please let me know if you have any questions.

University of Nebraska	ERG Recommended # of Samples	Unit \$	
Nitrate/Nitrite	82	\$	Ex. 4 CBI
N15 Isotope	82	\$	
WI State Lab			
Chloride	3	\$	
Ammonia -N	3	\$	
Nitrate/Nitrite	3	\$	
Nitrite	3	\$	
E. Coli	3	\$	

Total cost for the ERG recommended number of samples: \$ Ex. 4 CBI

Thanks,

Daisy Wang
